Exposure to secondhand smoke is a health hazard. The most important benefit of smoke free housing is that it enables tenants, employees, and other visitors to breathe air free of hazardous secondhand smoke. Tobacco smoke from neighboring units infiltrate other units. Secondhand smoke travels through lighting fixtures, cracks, shared heating and ventilation, around plumbing and under doors.

SOURCE: Tobacco Control legal Consortium Fact Sheet

Funding for this project came from the 2014 Chronic Disease Risk Reduction grant. Housing units with 10 or more units were included in this survey. Please call the Health Department at 316.283.1637 with corrections or updates.
