

ESF 1 - Transportation

Coordinating Agency:

Harvey County Road & Bridge

Primary Agency:

City of Burrton
City of Halstead
City of Hesston
City of Newton
City of North Newton
City of Sedgwick
City of Walton

Support Agencies:

Burrton - USD 369
Burrton CFD #5
Burrton Police Department
City of Burrton
City of Halstead
City of Hesston
City of Newton
City of North Newton
City of Sedgwick
City of Walton
Halstead - USD 440
Halstead Fire/EMS Department
Halstead Police Department
Harvey County Emergency Management
Harvey County Fire District #1
Hesston - USD 460
Hesston Fire/EMS Department
Hesston Police Department
Kansas Department of Transportation
Newton - USD 373
Newton Fire/EMS Department
Newton Police Department
Newton Public Works
North Newton Police Department
Sedgwick Fire/EMS Department
Sedgwick Police Department
Sedgwick Public Schools - USD 439
Walton Police Department

I. Purpose and Scope

A. Purpose

1. The purpose of ESF 1 is to provide resources of member agencies to support emergency transportation needs in Harvey County.

B. Scope

1. ESF 1 addresses both emergency transportation assistance and the maintenance of transportation routes. Specifically, it discusses:
 - a. Evacuation of people and resources
 - b. Restoration of transportation infrastructure
 - c. Coordination of resource movement
 - d. Traffic restrictions and transportation safety
 - e. Mutual aid and private sector transportation resources
2. Encompassed in this ESF is information on standard operating procedures for emergency routes, movement of responders, victims and supplies associated with response and recover efforts following a major disaster, egress and ingress information. Also included is information on major surface transportation routes as well as transport of services critical to the welfare of the citizens of Harvey County.

II. Concept of Operations

A. General

1. ESF 1 is organized consistent with the Harvey County EOC, the requirements of the National Response Framework, the National Incident Management System, and the Incident Command System. This structure and system supports incident assessment, planning, procurement, deployment, and coordination and support operations to Harvey County through the Harvey County Emergency Response Team, Area Operations and Regional Incident Management Teams (IMTs) to provide a timely and appropriate response to an emergency or situation.
2. Procedures, protocols and plans for disaster response activities are developed to govern staff operations at the Harvey County EOC and in the field. These are in the form of Emergency Operations Plan (i.e., Base Plan) and corresponding Appendices, Incident Annexes, Support Annexes and Standard Operating Guidelines, which describe ESF 1 capabilities. Periodic training and exercises are also conducted to enhance effectiveness.
3. In a large event requiring local or State mutual aid assistance, ESF 1 will work with its support agency counterparts to seek and procure, plan, coordinate and/or direct the use of required assets.
4. Throughout the response and recovery periods, ESF 1 will evaluate and analyze information requests to move people, materials, equipment and other resources as necessary; develop and update assessments of the transportation service

situation and status in the impact area; and undertake contingency planning to meet anticipated demands or needs.

5. Initial police response will setup up initial traffic control and depending on what roadway (State, County, and City) KDOT, Harvey County Road & Bridge, or city public works will help setup traffic control. Barricade placement will be coordinated by the response agencies and the local jurisdiction with assistance from Harvey County Road and Bridge. The local law enforcement agency has the authority to close local roads and will coordinate with KDOT for closure of state and/or federal highways. All road closures will be communicated to Harvey County Emergency Communications. Local law enforcement in coordination with Harvey County Emergency Management will establish alternate routes of access.
6. During events including aviation, maritime, surface, railroad or pipeline incidents, close coordination will be maintained between local, state and federal officials to determine potential needs for support and the most expeditious means of acquiring that support. Due to the vast amount of expertise, standard operating procedures and variety of entities with responsibilities relating to transportation within Harvey County, various incident management systems will be used for collecting, processing, and disseminating information. During an incident that involves a major disaster or emergency, all of this information will be collected and processed through the Harvey County EOC for dissemination to the public and to state and federal officials. Newton City-County Airport will be a resource for local agencies to implement air traffic management measures. If that resource is not available, the EOC will have to rely upon phone contact with the appropriate aviation resource such as the FAA.
7. Evacuation Procedures
 - a. Evacuation Order: With the order by the chief executive of the affected political subdivision, evacuation will start. In situations where rapid evacuation is critical to the continued health and safety of the population, the on-scene command authority may issue the order. In case of a hazardous material accident/incident, it may be the Law Enforcement Officer or Fire Chief. In other cases it may be one of the above or the responsible person. But in all cases the chief executive should be advised at once.
 - b. Evacuation Decision Considerations: Evacuation may be only one protective alternative. Care must be exercised so as not to pose more danger to he affected population. Some considerations are as follows:
 - Weather conditions
 - Evacuation routes, their capacities and susceptibilities to hazards.
 - The availability and readiness of shelters.
 - Modes of transportation for evacuees and for those unable to provide their own

- The location of special needs groups who pose unique problems, as the evacuation itself could be more life threatening to these groups than the initial hazard.
 - Be alert to any physical barriers, lack of transportation and considering the time consumption, should be implemented in the evacuation process planning.
- c. Evacuation Area Definition: The definition of the area will be up to the appropriate agencies or officials order. In all cases, the situation needs to be continually monitored. The command authority will insure that the evacuation area is defined in terms clearly understandable by the general public and that this information is provided to the Public Information Officer for rapid dissemination.
- d. Pet Evacuees: For large scale events, the County will rely on the Kansas State Animal Response Team (SART), the state chapter of the Veterinary Medical Association, and the Humane Society to help coordinate pet shelter activities, and on the Harvey County Extension Office and other farm-related agencies or organizations for issues regarding livestock.
- e. 7. Evacuation criteria will take into account variables such as demographics of the region, immediacy, seriousness and expected duration of the threat; vulnerable populations at risk; and adequacy/availability of evacuation routes. In all situations other than those involving immediate life safety concerns, decisions on whether and/or when to evacuate will always be made after consulting with the appropriate city/county departments or agencies, and will be coordinated with all the jurisdictions affected.
Evacuation routes will be determined based on the location of the event and the type of event. Maps of each municipality in Harvey County have been uploaded into the file archives section of this plan depicting the primary roads to be considered first and foremost. A County-wide roads map is also uploaded showing all roads, including the primary and those that would be considered secondary.
- f. Evacuation procedures will be supported by all agencies involved, based upon the decision made by the EOC in conjunction with the Incident Commander. Suspension of highway construction and maintenance and lane reversals will be determined by the Kansas Department of Transportation, the Kansas Highway Patrol, Harvey County Public Works, the Harvey County Sheriff or the local law enforcement or public works agency of the jurisdiction affected. Any suspensions or changes will be immediately relayed to the EOC to be released via ESF 15 - External Communications. Additional criteria may need to be considered during the following events: Natural Hazards: floodplain data, forecasts for ravine and/or flash flooding, rangeland fire danger indices, and other hazard specific warnings or advisories promulgated by agencies such as the National Weather Service, U.S. Geological Survey, etc. Technological Hazards: hazard classification of dams; or the quantity, toxicity, concentration, flammability and/or explosiveness, projected path,

proximity to other hazards, & time-distance-shielding factors for hazardous chemicals. Civil Hazards: location and type of event, number of people involved, and available resources.

Evacuation warnings will be given in coordination with ESF 15 - External Communications. Methods include email, text message, phone calls, social media outlets, media outlets and door to door notifications, if necessary.

For large scale events, the County will rely on the Kansas State Animal Response Teams (KSART), the Harvey Animal Response Team (ART) and the Humane Society to help coordinate pet shelter activities, and on the County Extension Office and other farm-related agencies or organizations for issues regarding livestock.

Families are encouraged to prepare all of their family members for disaster situations, including their pets and livestock. Information on these efforts is available through the media, NOAA radio and public education programs sponsored by Harvey County Emergency Management and the American Red Cross. Local veterinarians assist in educating pet owners of the need to prepare all family members by distributing brochures and fliers on disaster preparedness for pets. An important part of this preparedness is to have on hand a pet carrier to transport pets in the event of an evacuation.

First responders in Harvey County are not required to evacuate pets if the pet is not in a pet carrier. Emergency first responders primary job is the rescue of affected persons in danger and the safety of themselves. Decisions may have to be made that would require putting down critically injured animals or abandoning animals that may create a danger to responders or victims.

Pet owners should be aware that public shelters will not allow pets and that temporary animal shelters are restricted in the amount of time that an animal can be left before being considered abandoned. If sheltering of the evacuees becomes necessary, it will be handled as set out in ESF 6 - Mass Care, Housing and Human Services, in conjunction with ESF 11 - Agriculture and Natural Resources.

Most businesses, schools, hospitals, nursing homes, etc., have developed internal plans for providing expedient shelter within their facilities. While the county does not have any designated shelters for protection from natural or technological hazards, it does coordinate the activation of shelters for the purpose of providing mass care & shelter for persons displaced from their homes.

Evacuees from functional needs populations will be handled first by each individual agency to the best of their ability according to their facility/evacuation plan. If assistance is required, it can be requested through this ESF to local EMS agencies, public transportation agencies and each other.

- g. The method for registration and tracking of evacuees is the responsibilities of the evacuees and/or the American Red Cross depending on the situation.
- h. Hospitals-- There is one hospital in Harvey County that relies on the MERGe System in cooperation with Newton Fire/EMS to assist in the transportation of patients to the hospitals during a mass influx of patients. Newton Fire/EMS is part of the Medical Emergency Response Group (MERGe) that covers the south central and south east regions for ambulance resources. Upon a request from either Fire/EMS Chief or Emergency Management, the MERGe duty officer makes contact with the person making the request for assistance for details. This system can be for any disaster or anticipated disaster whereby participating partners can be put on stand-by. MERGe members have no obligation to respond. Other potential resources for transport of patients include Eagle Med, Life Team, Harvey County Department on Aging vans and busses, or other transportation.
- i.
 - Care Facilities, Assisted Living Centers, Independent Living Facilities
A variety of methods for transportation are available by the various agencies responsible for their care. However, large scale transportation would be difficult with few resources to cover a county of this size. Among the potential transportation resources are Harvey County Department on Aging, school buses, private vehicles, and charter vehicles. The number of vehicles needed for those with severe physical disabilities are extremely limited and would require the assistance of outside agencies and/or businesses.
 -
 - Schools
 - All schools in Harvey County have access to transportation and have transportation plans in place.
 - Detention Center
- j. The Harvey County Detention Center has limited transportation capabilities and would require assistance from Harvey County to transport its population members and staff to appropriate receiving facilities. The Harvey County Detention Center (located in the City of Newton) also has limited transportation capabilities and would require either the School Districts or private vendors to transport its population members and staff to appropriate receiving facilities.
- k. Day Care Facilities
 - These facilities are generally smaller in nature and should have their own evacuation plan in place.

Resources ranging from vehicles to vans to trailers which could aid in an evacuation is not included in this ESF. Those resources are in the Harvey County Resource Directory kept on file at the Emergency Management

office and are considered to be confidential information due to private contact information.

Special need populations and locations are not included in this ESF. That information is included in the 2009 Hazard Mitigation Plan and the 2011 Regional Hazard Analysis kept under separate cover at the Emergency Management office.

When the danger has passed, the public will be informed via previously mentioned techniques and methods through ESF 15 - External Communications.

When the emergency/disaster situation has stabilized and it is again safe to return to a previously evacuated area, the authorization to allow reentry will be funneled through the EOC, the IC, or as otherwise directed. As reentry is determined to be possible, limited access will be allowed primarily based on safety factors. The accessibility of the reentry due to available routes will be another factor for consideration and will be determined by the size of the area affected and the type of incident. Special permissions for reentry can be granted by governmental and administrative authorities of the affected jurisdiction. That information will be provided to the EOC to be shared by ESF 15 - External Communications. Clean up crews will be utilized as soon as the affected area is safe to be entered.

8. Transportation Infrastructure

- a. Ensure damage assessments are performed on infrastructure and transportation systems, facilities and equipment.
- b. Coordinate with other response agencies regarding the operational capabilities of the transportation system.
- c. Assign transportation resources to move materials, personnel and supplies as requested by first responders.
- d. Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
- e. Assist in initiating traffic management operations and control strategies.
- f. Provide field support for emergency responders at the scene integrated through the ICS.
- g. Continue to coordinate transportation of equipment, supplies and people.
- h. Continue to perform tasks necessary to expedite restoration and recovery operations

- i. The monitoring and reporting of infrastructure damage must begin at the immediate onset of an event. Each public works agency will be responsible for tracking damages to their respective infrastructure. As agencies receive damage reports, it will be funneled to the EOC, where damage will be tracked via damage assessment form. If the damage creates a road blockage or closure, the information will be maintained on a status board and also given to ESF 2 - Internal Communications for immediate first responder dissemination and ESF 15 - External Communications for public release. Agencies that are responsible for transportation infrastructure should have their own Continuity of Operations protocols to establish priorities. Primary agencies to maintain the roadways are KDOT, Harvey County Road and Bridge, City Public Works and Townships. Each will have a responsibility for their own roadways. If the event is not widespread, mutual aid among these agencies will ensure that assistance is provided to keep from one agency being overwhelmed. Emergency repair and restoration will be prioritized by ESF 1 partners along with the governmental body of the affected jurisdiction. Main arterial roads (in the cities and county) will receive priority followed by lesser-traveled secondary roads (county and township roads).

B. Direction and Control

1. The ESF 1 Coordinating Agency is Harvey County Road & Bridge which is appointed by the Harvey County Emergency Management , in coordination with local planning partners. The staff member serving as ESF 1 Coordinator is appointed by and located in the Harvey County Road & Bridge . When ESF 1 support is necessary, the ESF 1 Coordinator coordinates all aspects of ESF 1.
2. ESF 1 complies with the National Response Framework, and the National Incident Management System (NIMS). The NIMS guides the direction and control system adopted by the Harvey County Emergency Management , which functions as the official disaster prevention, protection, response, preparedness, recovery, and mitigation organization within Harvey County.
3. The ESF 1 may operate at two levels: 1) Harvey County EOC; and 2) Field operations
4. During emergency activations, all management decisions regarding transportation for Harvey County are made at the Harvey County EOC by the ESF 1 coordinator. Under the Incident Command System structure, the Planning, Logistics, Finance/Administration, and Operations Section and associated staff at the Harvey County EOC assist the incident commander in carrying out the overall mission.
5. In accordance with a mission assignment from ESF 1, each primary and/or support organization assisting ESF 1 will retain administrative control over its own resources and personnel, but will be under the operational control of ESF 1. Mission operational control may be delegated to the field by the Harvey County EOC

6. A matrix that resembles that SEOC organizational chart is in place in Harvey County. This chart can be found in attachments.

7. Organization

1. County

- a. During an activation of the Harvey County EOC, primary and support agency staff are integrated with the Harvey County Road & Bridge staff to provide support.
- b. During an emergency or disaster event, the Harvey County EOC, Operations Section Chief will coordinate resource support with the Infrastructure Services Branch Chief.
- c. During the response phase, ESF 1 will evaluate and analyze information regarding transportation services requests. ESF 1 will develop and update assessments of the transportation services status in the impacted area and undertake contingency planning to meet anticipated transportation requirements.
- d. The Harvey County Road & Bridge will develop and maintain the overall ESF 1 Annex and accompanying Appendices, Annexes and Standard Operating Guidelines that govern response actions related to emergencies. Primary and support agencies should develop and maintain their own similar documents for internal use, which must be compatible with and in support of the overall EOP. All such documents will be in compliance with the National Response Framework, The National Incident Management System, the Incident Command System, and the Harvey County EOP.
- e. The Harvey County Road & Bridge shall be represented in ESF 5 (Information and Planning) and support disaster intelligence collection and analysis as relates to the ESF 1 scope.

2. State of Kansas

- . During an activation of the State of Kansas EOC, the Kansas Department of Transportation is the designated lead agency for State transportation services and may provide a liaison to facilitate requests for transportation service resources to local Emergency Operations Centers.
- a. During an emergency or disaster event, the primary and support agencies of ESF 1 at the State of Kansas EOC will report to the Infrastructure Services Branch Chief, who reports to the Response Section Chief under the overall direction of the SEOC Manager.
- b. The Kansas Department of Transportation, in coordination with Kansas Highway Patrol, develops and maintains the overall ESF 1

Annex. Primary and support agencies should develop and maintain their own similar documents for internal use, which must be compatible with and in support of the overall Kansas Response Plan. All such documents will be in compliance with the National Response Framework, the National Incident Management System, the Incident Command System and the Kansas Response Plan.

C. Alerts and Notifications

1. The Harvey County Road & Bridge and/or Harvey County Emergency Management will notify the County Warning Point (Harvey County EOC) when information comes to their attention indicating that an emergency or disaster situation is developing.
2. The County Warning Point (Harvey County EOC), will notify the “on call” Emergency Duty Officer and/or ESF 1 Coordinator when Harvey County has been threatened or impacted by an emergency or disaster event as provided in the County Warning Point procedure.
3. ESF 1 will be activated or placed on standby upon notification by the Harvey County EOC. The representatives or designees of the coordinating agency will manage the emergency activities of ESF 1. If additional support is required, the ESF 1 coordinating and primary agencies may jointly manage ESF 1 activities.
4. Upon instructions to activate or placement of ESF 1 on standby, Harvey County Road & Bridge will implement procedures to notify all ESF 1 planning team members and, if necessary, mobilize all personnel, facilities, and physical resources likely to be needed, based on the emergency circumstance.

D. Actions

1. Actions carried out by ESF 1 are grouped into phases of emergency management: Preparedness, Response, Recovery and Mitigation. Each phase requires specific skills and knowledge to accomplish the tasks and requires significant cooperation and collaboration between all ESF 1 agencies and the intended recipients of service.

Overall Actions Assigned to All Members	
<i>Preparedness (Pre-Event) Actions for ESF 1 - Transportation</i>	
1	Participate in after action meetings and prepare after action reports as requested.
2	Participate in the hazard identification process to identify and correct vulnerabilities.

Overall Actions Assigned to All Members	
<i>Response (During Event) Actions for ESF 1 - Transportation</i>	
1	Coordinate the pre-positioning of resources with other agencies.
2	Participate in after action meetings and prepare after action reports as requested.

3	Participate in the hazard identification process to identify and correct vulnerabilities.
---	---

Overall Actions Assigned to All Members	
<i>Recovery (Post Event) Actions for ESF 1 - Transportation</i>	
1	Participate in after action meetings and prepare after action reports as requested.
2	Provide personnel and resources to support damage assessment teams.
3	Identify transportation reentry criteria and reentry routes.
4	Clean, repair, and perform maintenance on all equipment before returning to normal operations or storage.
5	Participate in the hazard identification process to identify and correct vulnerabilities.

Overall Actions Assigned to All Members	
<i>Mitigation Actions for ESF 1 - Transportation</i>	
1	Participate in the hazard identification process to identify and correct vulnerabilities.
2	Participate in mitigation planning team meetings and work with local emergency management to promote community preparedness.
3	Participate in after action meetings and prepare after action reports as requested.

III. Responsibilities

- A. The following list identifies the responsibilities designated to each agency/organization for this ESF. The Coordinating and Primary Agency and their responsibilities are listed first. The Supporting Agencies follow in alphabetical orders.

Coordinating: Harvey County Road & Bridge	
<i>Preparedness (Pre-Event) Actions for ESF 1 - Transportation</i>	
1	Maintain a central personnel roster, contact, and resource lists to support ESF-1 tasks.
2	Identify who is responsible for initial notification of ESF-1 personnel.
3	Identify responsibilities for liaison roles with state and adjacent county transportation officials.
4	Develop standard operating guides and checklists to support ESF-1 activities.
5	Collect, process, and disseminate information to and from the EOC.
6	Develop and maintain ESF-1 Annex.
7	Participate in training, drills, and exercises.
8	Develop mutual aid and other support agreements with surrounding jurisdictions and the private sector.
9	Identify resources to assist with evacuation and movement of people.
10	Coordinate with response agencies and EOC regarding the operational capabilities of the transportation system.
11	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
12	Continue to perform tasks necessary to expedite restoration and recovery operations.

13	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
14	Evaluate response and recommend changes to ESF-1 Annex to correct shortfalls and improve future response activities.
15	Provide documentation for possible financial reimbursement process for recovery activities.
16	Prioritize emergency repair and restoration of transportation infrastructure.
17	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
18	Provide ESF-1 representative for update of mitigation plan.
19	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
Response (During Event) Actions for ESF 1 - Transportation	
1	Designate personnel to coordinate ESF-1 activities in EOC.
2	Manage the collection, processing, and dissemination of information between ESF-1 and EOC or incident command
3	Provide field support for emergency responders at the scene
4	Participate in EOC briefings, incident action plans, situation reports and meetings to support ESF1
5	Coordinate and/or perform damage assessments on infrastructure, transportation systems, facilities and equipment.
6	Coordinate with response agencies and EOC regarding the operational capabilities of the transportation system.
7	Coordinate with other agencies to recommend evacuations.
8	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
9	Continue to perform tasks necessary to expedite restoration and recovery operations.
10	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
11	Evaluate response and recommend changes to ESF-1 Annex to correct shortfalls and improve future response activities.
12	Provide documentation for possible financial reimbursement process for recovery activities.
13	Prioritize emergency repair and restoration of transportation infrastructure.
14	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
15	Provide ESF-1 representative for update of mitigation plan.
16	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
Recovery (Post Event) Actions for ESF 1 - Transportation	
1	Continue to perform tasks necessary to expedite restoration and recovery operations.
2	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
3	Evaluate response and recommend changes to ESF-1 Annex to correct shortfalls and improve future response activities.
4	Provide documentation for possible financial reimbursement process for recovery activities.
5	Prioritize emergency repair and restoration of transportation infrastructure.
6	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
7	Coordinate with response agencies and EOC regarding the operational capabilities of the

	transportation system.
8	Coordinate with other agencies to recommend evacuations.
9	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
10	Provide ESF-1 representative for update of mitigation plan.
Mitigation Actions for ESF 1 - Transportation	
1	Provide ESF-1 representative for update of mitigation plan.
2	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
3	Coordinate with response agencies and EOC regarding the operational capabilities of the transportation system.
4	Coordinate with other agencies to recommend evacuations.
5	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
6	Continue to perform tasks necessary to expedite restoration and recovery operations.
7	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
8	Evaluate response and recommend changes to ESF-1 Annex to correct shortfalls and improve future response activities.
9	Provide documentation for possible financial reimbursement process for recovery activities.
10	Prioritize emergency repair and restoration of transportation infrastructure.
11	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.

Primary: City of Burrton	
Preparedness (Pre-Event) Actions for ESF 1 - Transportation	
1	Develop standard operating guides and checklists to support ESF-1 activities.
2	Collect, process, and disseminate information to and from the EOC.
3	Participate in training, drills, and exercises.
4	Identify resources to assist with evacuation and movement of people.
5	Identify guidance for evacuation of vulnerable facilities.
6	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
7	Assist in initiating traffic management operations and control strategies.
8	Assist establishing alternate routes of access required due to road closures.
9	Continue to perform tasks necessary to expedite restoration and recovery operations.
10	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
11	Provide documentation for possible financial reimbursement process for recovery activities.
12	Prioritize emergency repair and restoration of transportation infrastructure.
13	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
14	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
Response (During Event) Actions for ESF 1 - Transportation	
1	Designate personnel to coordinate ESF-1 activities in EOC.
2	Provide field support for emergency responders at the scene
3	Coordinate and/or perform damage assessments on infrastructure, transportation systems,

	facilities and equipment.
4	Coordinate with other agencies to recommend evacuations.
5	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
6	Assist in initiating traffic management operations and control strategies.
7	Assist establishing alternate routes of access required due to road closures.
8	Continue to perform tasks necessary to expedite restoration and recovery operations.
9	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
10	Provide documentation for possible financial reimbursement process for recovery activities.
11	Prioritize emergency repair and restoration of transportation infrastructure.
12	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
13	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
<i>Recovery (Post Event) Actions for ESF 1 - Transportation</i>	
1	Continue to perform tasks necessary to expedite restoration and recovery operations.
2	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
3	Provide documentation for possible financial reimbursement process for recovery activities.
4	Prioritize emergency repair and restoration of transportation infrastructure.
5	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
6	Coordinate with other agencies to recommend evacuations.
7	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
8	Assist in initiating traffic management operations and control strategies.
9	Assist establishing alternate routes of access required due to road closures.
<i>Mitigation Actions for ESF 1 - Transportation</i>	
1	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
2	Coordinate with other agencies to recommend evacuations.
3	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
4	Assist in initiating traffic management operations and control strategies.
5	Assist establishing alternate routes of access required due to road closures.
6	Continue to perform tasks necessary to expedite restoration and recovery operations.
7	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
8	Provide documentation for possible financial reimbursement process for recovery activities.
9	Prioritize emergency repair and restoration of transportation infrastructure.
10	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.

Primary: City of Halstead

Preparedness (Pre-Event) Actions for ESF 1 - Transportation

1	Develop standard operating guides and checklists to support ESF-1 activities.
2	Collect, process, and disseminate information to and from the EOC.

3	Participate in training, drills, and exercises.
4	Identify resources to assist with evacuation and movement of people.
5	Identify guidance for evacuation of vulnerable facilities.
6	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
7	Assist in initiating traffic management operations and control strategies.
8	Assist establishing alternate routes of access required due to road closures.
9	Continue to perform tasks necessary to expedite restoration and recovery operations.
10	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
11	Provide documentation for possible financial reimbursement process for recovery activities.
12	Prioritize emergency repair and restoration of transportation infrastructure.
13	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
14	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
<i>Response (During Event) Actions for ESF 1 - Transportation</i>	
1	Designate personnel to coordinate ESF-1 activities in EOC.
2	Provide field support for emergency responders at the scene
3	Coordinate and/or perform damage assessments on infrastructure, transportation systems, facilities and equipment.
4	Coordinate with other agencies to recommend evacuations.
5	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
6	Assist in initiating traffic management operations and control strategies.
7	Assist establishing alternate routes of access required due to road closures.
8	Continue to perform tasks necessary to expedite restoration and recovery operations.
9	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
10	Provide documentation for possible financial reimbursement process for recovery activities.
11	Prioritize emergency repair and restoration of transportation infrastructure.
12	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
13	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
<i>Recovery (Post Event) Actions for ESF 1 - Transportation</i>	
1	Continue to perform tasks necessary to expedite restoration and recovery operations.
2	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
3	Provide documentation for possible financial reimbursement process for recovery activities.
4	Prioritize emergency repair and restoration of transportation infrastructure.
5	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
6	Coordinate with other agencies to recommend evacuations.
7	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
8	Assist in initiating traffic management operations and control strategies.
9	Assist establishing alternate routes of access required due to road closures.

Mitigation Actions for ESF 1 - Transportation	
1	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
2	Coordinate with other agencies to recommend evacuations.
3	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
4	Assist in initiating traffic management operations and control strategies.
5	Assist establishing alternate routes of access required due to road closures.
6	Continue to perform tasks necessary to expedite restoration and recovery operations.
7	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
8	Provide documentation for possible financial reimbursement process for recovery activities.
9	Prioritize emergency repair and restoration of transportation infrastructure.
10	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.

Primary: City of Hesston	
Preparedness (Pre-Event) Actions for ESF 1 - Transportation	
1	Develop standard operating guides and checklists to support ESF-1 activities.
2	Collect, process, and disseminate information to and from the EOC.
3	Participate in training, drills, and exercises.
4	Identify resources to assist with evacuation and movement of people.
5	Identify guidance for evacuation of vulnerable facilities.
6	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
7	Assist in initiating traffic management operations and control strategies.
8	Assist establishing alternate routes of access required due to road closures.
9	Continue to perform tasks necessary to expedite restoration and recovery operations.
10	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
11	Provide documentation for possible financial reimbursement process for recovery activities.
12	Prioritize emergency repair and restoration of transportation infrastructure.
13	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
14	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
Response (During Event) Actions for ESF 1 - Transportation	
1	Designate personnel to coordinate ESF-1 activities in EOC.
2	Provide field support for emergency responders at the scene
3	Coordinate and/or perform damage assessments on infrastructure, transportation systems, facilities and equipment.
4	Coordinate with other agencies to recommend evacuations.
5	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
6	Assist in initiating traffic management operations and control strategies.
7	Assist establishing alternate routes of access required due to road closures.
8	Continue to perform tasks necessary to expedite restoration and recovery operations.

9	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
10	Provide documentation for possible financial reimbursement process for recovery activities.
11	Prioritize emergency repair and restoration of transportation infrastructure.
12	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
13	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
Recovery (Post Event) Actions for ESF 1 - Transportation	
1	Continue to perform tasks necessary to expedite restoration and recovery operations.
2	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
3	Provide documentation for possible financial reimbursement process for recovery activities.
4	Prioritize emergency repair and restoration of transportation infrastructure.
5	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.
6	Coordinate with other agencies to recommend evacuations.
7	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
8	Assist in initiating traffic management operations and control strategies.
9	Assist establishing alternate routes of access required due to road closures.
Mitigation Actions for ESF 1 - Transportation	
1	Identify and correct potential shortfalls in the ability to use emergency access and egress routes and available transportation resources.
2	Coordinate with other agencies to recommend evacuations.
3	Assist in making decisions regarding closures, restrictions, and priority repairs to transportation routes.
4	Assist in initiating traffic management operations and control strategies.
5	Assist establishing alternate routes of access required due to road closures.
6	Continue to perform tasks necessary to expedite restoration and recovery operations.
7	Return borrowed resources and those obtained through agreement, lease, or rental when those resources are no longer required.
8	Provide documentation for possible financial reimbursement process for recovery activities.
9	Prioritize emergency repair and restoration of transportation infrastructure.
10	Continue to coordinate transportation of equipment, supplies and people until authorized to demobilize.

Response (During Event) Actions for ESF 1 - Transportation	
1	Coordinate the transportation of evacuated animals to designated shelters.
Recovery (Post Event) Actions for ESF 1 - Transportation	
1	Coordinate the transportation of evacuated animals to designated shelters.
Mitigation Actions for ESF 1 - Transportation	
1	Coordinate the transportation of evacuated animals to designated shelters.

1. All tasked agencies will:
 - a. Develop applicable SOPs, guidelines and/or checklists detailing the accomplishment of their assigned functions.
 - b. When requested, deploy a representative to the EOC to assist with transportation activities
 - c. Provide ongoing status reports.
 - d. Maintain updated resource inventories of supplies, equipment, and personnel resources, including possible sources of augmentation or replacement.

- e. Document all costs and expenses associated with response and recovery activities taking care to clearly separate disaster related work from daily work in the event that state and federal reimbursement becomes available.
 - f. Maintain up-to-date rosters for notifying personnel and 24-hour staffing capabilities, and provide this information to the Harvey County Emergency Management Department.
 - g. Perform other emergency responsibilities as assigned.
 - h. All of the emergency functions detailed in this plan could play a role in successfully carrying out an evacuation in Harvey County. The overall responsibility for issuing evacuation orders rests with the chief elected executives of the affected political subdivisions; however, the on-scene command authority can make a decision to evacuate when there is an immediate need in order to protect lives and provide for public safety. Coordination of evacuation support efforts will be carried out by the Emergency Management Director. Key organizational requirements are:
2. County/City Office Holders
 - a. Responsible for the overall mobilization of county/city capabilities that cover facets of support to the commissioners and to the public.
 3. Law Enforcement Agencies
 - a. Responsible for conducting actual evacuation efforts, for designating evacuation routes, providing traffic and movement control, and establishing security for the evacuated area. If necessary, they will also assist in warning the public.
 4. Fire Departments
 - a. For hazardous material and fire incidents, the fire department is responsible for on-scene control and advising executives on the evacuation decision. Also responsible for fire security in evacuated areas and assistance in warning the public.
 5. Public Information Officer
 - a. Responsible for dissemination of emergency information advising the public of what evacuation actions to take.
 6. Reception and Care Coordinator
 - a. The school districts will be responsible for coordinating Reception and Care activities to include: registration, lodging, and feeding facilities. This effort will be supported by the American Red Cross, The Salvation Army, and other agencies.

- b. Will support the evacuation of areas maintaining routes and providing manpower and equipment o transport evacuees. Assist law enforcement in property protection and perimeter and traffic control.
- 7. Harvey County Service Organizations
 - a. Provide manpower and equipment, assist in evacuation, and conduct search and rescue operations. Assist with transportation and provide communications.
- 8. State Departments
 - a. Will ensure Social Service programs are continued and supported. Provide manpower and equipment and implement crisis counseling and other activities to assist special needs groups such as the handicapped, infirmed, and elderly.
- 9. Harvey County Emergency Management Director
 - a. Responsible for advising the County Commissioners and City government on the evacuation decision, coordinating evacuation support activities, providing for special transportation, and managing resources.

IV. Financial Management

- A. ESF 1 is responsible for coordinating with Harvey County Administration to manage ESF 1 expenses relevant to an event.
- B. During a response, each agency/department fund disaster operations from their current operating budget and are responsible for recording and tracking agency expenditures. If a federally declared disaster exists, each agency is responsible for seeking reimbursement in accordance to the formula has established by the Federal Emergency Management Agency via the FEMA/State Agreement.
- C. Expenditures by support entities will be documented by those entities and submitted directly to the Harvey County Administration or a designated Finance Service officer as soon as possible.
